

Star Wheel and Star Wheel Holder Assembly Instructions

Star Wheel

Cut along the BLACK OUTER CIRCLE of the Star Wheel

Star Wheel Holder

Cut along the SOLID lines of the Star Wheel Holder

Cut out the circle in the middle of the Star Wheel Holder

Fold the bottom of the Star Wheel Holder BACK along the longest dotted line

Fold the two sides of the Star Wheel Holder BACK along the dotted lines

Staple each side of the Star Wheel Holder to hold the folds back

Place the Star Wheel behind the Star Wheel Holder in the pocket formed by the folded parts

Using the Star Wheel

Align the current date (on the Star Wheel) with the current time (on the Star Wheel Holder)

Face South

Hold the Star Wheel over your head so that the label "Southern Horizon" points south

North should be behind you

The star positions in the sky should match those on the Star Wheel

Use the Star Wheel to identify the constellations!
